Startup Scene Definer – User Guide

How to configure:

1 – Go to *Edit > Project Settings > Startup Scene Definer*

2 - Check *Enable*

3 - Set the *Startup Scene Index*.

4 - Use "*Ignore Name Suffix*" to ignore automatic initialization with the active scene in the editor that has this Suffix. For example *GameTest*.

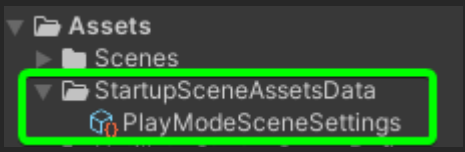

How to Remove:

1 - Go to Package Manager and find for "*Startup Scene Definer"*

2 - Click in "*Remove*" button.

3 - Go to *Assets/* and remove *StartupSceneAssetsData* folder. This folder contains the configuration file

Thanks for use!
